SPHERICAL VECTOR OPTIMIZATION ENGINE

Enterprise Pricing & Tiered License Sheet

Licensor: Spencer Graham (spencer830graham@gmail.com)

Tiered Licensing Summary

Tier Details	Annual License Fee	Maintenance & Support	Deployment Scope	Target Use Case
Tier 1: Single-Node / PoC	$35,000 USD / year	$7,000 USD / year *(20% mandatory)*	Single GPU instance / workstation (up to 1 GPU die)	Academic labs, individual researchers, early-stage testing pipelines
Tier 2: Multi-Node Enterprise	$75,000 USD / year	$15,000 USD / year *(20% mandatory)*	Multi-GPU clusters (up to 8 GPU nodes / CUDA instances)	Enterprise spatial computing, aerospace simulation, high-throughput graphics
Tier 3: Source Code & Escrow	$150,000 USD *(one-time fee)*	$30,000 USD / year *(20% updates/support)*	Unlimited internal enterprise deployment & source code rights	Fortune 500 tech partners, defense contractors, specialized spatial IP integration

---

Deliverable Specifications

- **Tier 1 (Single-Node / PoC):** Compiled `engine.py` production module

- **Tier 2 (Multi-Node Enterprise):** Compiled `engine.py` module with multi-threaded CUDA runtime optimization
- **Tier 3 (Source Code & Escrow License):** Full uncompiled PyTorch CUDA source code, master benchmarking suite, and comprehensive documentation

---

Proposed License Agreement Revision

SECTION 4: PAYMENT & FEES

To update your baseline agreement, replace Section 4 with the following terms:"In consideration for the license granted herein, Licensee shall select one of the following licensing tiers upon execution of this Agreement:(a) **Tier 1 (Single Node):** $35,000 USD annual license fee + $7,000 USD annual maintenance fee.(b) **Tier 2 (Multi-Node Enterprise):** $75,000 USD annual license fee + $15,000 USD annual maintenance fee.(c) Tier 3 (Source Code Access): $150,000 USD license fee + $30,000 USD annual support fee.All fees are due upon execution of this Agreement and annually thereafter."
